TOUCH THE DIFFERENCE

TEOS TOUCH 10/12''

Especially adapted to KIOSK and industry applications

These small resistive touch screen Panel-PCs are very robust despite their small dimensions (10.4 and 12.1") ; they can be easily used or integrated in many applications such as kiosks, digital signage and display systems.

Equiped with the most recent technologies, they operate thanks to the the latest INTEL BayTrail J1900 processor generation, combining good performance with a lowered power consumption.

The system is fanless, dust-resistant and splash-proof, offering protection against water and other liquids.

The front face complies with IP65 standards, so the system is ideal for use in harsh environments.
