

## PRESS INFORMATION

July 2009

### **Munich Olympic Stadium chooses Galéo by POSLIGNE® to manage till operations in its fast-food and takeaway catering facilities**

Lisses (France) & Fürstentfeldbruck (Germany), 10 July 2009; *Olympiapark München, Munich's Olympic Stadium, has chosen to equip all of its fast-food and takeaway catering outlets with Galéo by POSLIGNE® till/management terminals.*

The total equipment pool - managed centrally - comprises some **50 systems**, designed and developed by the **AURES Group**. It covers all **19 restaurant areas** and food stalls located throughout the stadium, along with their 50 tills, ready to deal with a maximum total customer capacity of 12,500 at any one time.

*"This represents a major deployment for AURES in Germany", explained Hilmar BUCHWALD, AURES' Manager for German-Speaking Europe. "It formed part of a modernisation programme for the stadium involving renovation of its catering and takeaway food facilities and the networking of its IT systems. The installation demonstrates our ability to adapt to the requirements of major sports and events venues, a sector in which we are becoming firmly established".*

**POSLIGNE®**

EPOS TO MATCH YOUR STORE DECOR

*"The solidity and performance of Galéo terminals on our multiple-till counters - as well as their small footprint - were decisive factors when it came to choosing our quick-service catering infrastructure", added Mr. Richard LINDENMEIER, the Stadium's Catering Services Manager.*

*"Galéo's vertical lines, touchscreen and customer display are just right for our environment. Our till staff need to be able to serve menus and take payment simultaneously for a continuous stream of customers, many of whom arrive in significant numbers to benefit from our catering facilities, all at the same time – match half-times, intervals during performances, breaks during conferences and so on."*

*The Galéo by POSLIGNE® terminals deployed in the Munich Olympic Stadium's catering facilities use software developed by PC Cash, integrated by BHS Daten Systemen.*

#### About the AURES Group

Founded in 1989 and listed on Euronext Paris since 1999, the AURES Group manufactures EPoS Point of Sale terminals and related peripherals, which it markets under the POSLIGNE® brand.

Acclaimed for their reliability and performance, these PC-based, open-system hardware and systems are designed to provide management and till functions in specialist food and non-food stores, mass retail outlets, in the services and hotel-hospitality and catering industry.

The AURES Group aims to be the most creative leader in this field of business, with design oriented and colourful EPoS equipment.

POSLIGNE® systems' distribution is handled by the AURES head office in France, the Group's subsidiaries in Great Britain, Germany and the USA, and a resellers' network present in some forty countries.
