PRESS RELEASE

September 2010

New POSLIGNE® ODP 500 thermal receipt printer: compact, with front paper-loading for easy integration and access beneath the cash desk

Lisses & Runcorn - September 27th, 2010; *the AURES Group, which develops and manufactures* **POSLIGNE®** *point of sale terminals and systems, unveils its new thermal receipt printer, the* **ODP 500***.*

Ultra-compact and easy to integrate into any cash desk area, this printer is specially designed for point of sale and service (POS) applications. It is one of the only models in its category to feature ***front paper-loading and receipt printout.***

All the printer's controls and access points are located on its ***front face*** and not on the top, making it easy to install beneath counters in all walks of business: *small and large retail, shops, stores, hotels and catering industry, bars, museums, public facilities, leisure centres and all points of service...etc.*

The front loading feature means that paper rolls can be replaced without moving the printer - a real advantage in environments with limited cash desk space or for which the location's aesthetics dictate that the countertop should remain completely uncluttered.

The POSLIGNE® ODP 500 boasts a print speed of 200mm/second, automatic paper loading and cutting and a choice of 5 interfaces. It is supplied ready for use, with all the required cables.

About the AURES Group

Founded in 1989 and listed on Euronext Paris since 1999, the AURES Group manufactures point-of-sale terminals and systems as well as related peripherals, which it markets under the POSLIGNE® brand.

Acclaimed for its reliability and performance, this PC-based, open-system hardware is designed to provide management and till functions in specialist food and non-food stores, mass retail outlets and the hotel and catering industry.

Offering hardware featuring innovative designs and a wide range of fully interchangeable colours, the AURES Group is positioned as the most creative leader in its field.

Distribution of POSLIGNE® systems is based out of AURES' headquarters in France, the Group's three subsidiaries in the United Kingdom, Germany and the USA, and a distributor network present in over forty countries.
