AURES introduces *Yuno* VESA

This robust EPOS system - yet the most stylish hardware in its category - is now presented in its VESA version, for dedicated wall or pole-mounted applications.

Lisses, Runcorn - April 2015*; the VESA version of AURES' Yuno terminal is announced: flexible, adaptable and multi-application, the latest EPOS in AURES point of sale systems' range is now available in 2 new configurations:*

- supplied without its traditional base (stand), the point-of-sale system can be wall-mounted, ideal for retail applications where space is tight and where operators stand most of the time at point of purchase.

- The VESA option also enables the terminal to be located on a pole – either articulated or not – and thus positioned at the optimum eye level, for improved ergonomics and greater comfort of both users and customers.

Just like the standard model*,* the **Yuno VESA** option stands up to dirt in the toughest settings (fanless sytem with PCAP multitouch panel resisting fat, crumbs, dust, splashes, and leftovers in kitchens, restaurants and bakeries). The energy efficient Bay Trail J1900 processor (consuming just 10 W), together with the heat-dispersing aluminium structure, prevents overheating and ensures compliance with current environmental norms.

Robust, reliable and accessible, **Yuno VESA** offers many advantages (technology, ergonomics, innovation and design) which make it good value for money. It is a sensible, cost-effective and long-term investment for any EPOS IT equipment.

- Compact, heavy duty but stylish EPOS
- VESA bracket option(s), for wall or pole mounting installations
- Quad-core Bay Trail J1900 processor
- 2.5'' 64 GB SSD (2 slots)
- Projected, capacitive, multi-touch screen (PCAP)
- 4 GB memory as standard (upgradable to 8 GB)
- Discreet yet easily accessible connectivity
- Energy efficient processor (10W) and low carbon footprint

About AURES Technologies - www.aures.com

Founded in 1989 and listed on Euronext since 1999, the AURES Group manufactures EPOS systems and related peripherals. Its PC-based hardware and open-system equipment provides management and till functions to all points-of-sale and points-of-service, including specialist food and non-food stores, retail outlets, superstores, restaurants and all catering & hospitality businesses.

With corporate sales over €64 million for 2014, the AURES Group has global presence, with its head office in France, subsidiaries in the UK, Germany, Australia and the USA - and a network of distributors and resellers in 50+ countries.
