# KOMET
Innovative, flexible and space-saving design

Kiosk in portrait format for an optimized customer experience

KOMET is an interactive and multi-function touch solution, an indispensable kiosk equipment to optimize fluidity and speed up service times to guarantee a successful Customer Experience.

With a sober and elegant design, available in 3 versions (Single-sided, Double-sided and Wall-mounted), it can be integrated into most commercial environments, from Catering and Hospitality to Retail, Leisure and Services.

KOMET integrates AURES' high-performance and flexible OEM equipment, such as a YUNO Kiosk 27" system in portrait mode, an ODP 444 ticket printer, a payment terminal and a 2D imager barcode scanner. An indicator light, positioned at the top of the kiosk, allows instant identification of its operating status and distinct monitoring of the different assistance needs of the customer (user assistance, end of paper in the printer, alerts if necessary, etc).

Whatever the chosen configuration, the KOMET kiosk offers an adapted footprint, significantly reducing the space requirement within the point of sale. This space saving is an opportunity to increase the number of kiosks and thus enhance the perceived quality of service.
