# MINI KOMET

Compact Self-Checkout KIOSK

17" interactive KIOSK Solution Counter-top, wall-mount & standalone versions

Tested and validated
CE DIRECTIVES
in Test Laboratory

AURES' **MINI KOMET** is the compact version (17" touchscreen) of the KOMET kiosk.

Based on the design of the KOMET range, MINI KOMET is available in 3 different configurations: counter-top, wall-mounted or pedestal version (free-standing).

KOMET offers small dimensions (49 x 19 x 57 cm) and is a powerful and ergonomic kiosk solution which has been developed for sales environments where space is sometimes limited.

It integrates a 17" 4/3 YUNO Kiosk panel PC, an AURES ODP 444 receipt printer, a payment terminal (several models are proposed), as well as a high-performance 2D barcode reader (Datalogic).

An indicator light, positioned at the top of the kiosk, makes it possible to instantly identify the operating status of the equipment and to monitor the various assistance needs of the customer during his journey (user assistance, end of paper in the printer, warning in case of specific needs, etc).

The MINI KOMET self-checkout solution allows consumers to scan and pay for their purchases independently; this small kiosk is an essential complement to traditional POS or Mobile POS checkouts in many sectors (snacking & food-service, grocery stores and mini-markets, take-away sales, etc.).

MINI KOMET

Countertop, wall or standalone version (pedestal)

4/3 screen (YUNO Kiosk 17")

Projected capacitive panel (PCAP) and 10-point multi-touch

Choice of 3 processors: i5, i3 or J1900

2.5" 128 GB SSD
